

RECARO

Sport Seats

Sporting flair, safety and individuality – a new dimension in seating

Feel the difference

Maximum sporting flair in super-modern design. The ultimate driving experience.

More than 30 years of experience in professional motorsport has achieved a development leap for RECARO seats in terms of safety and technology – features being used by more and more drivers all over the world. Current crash tests on various car seats and racing shells have re-confirmed the impressive benefits of RECARO.

Everything under control? Car seats play a decisive role, especially with a competitive driving style. The better you sit, the better your reactions, the better your control of the vehicle. RECARO builds car seats that adapt optimally to your needs, so that you can drive more safely and with greater concentration. The long-term experience gained in professional motorsport (e.g. ALMS, WTCC, WRC, DRM, ETCC long-distance championship) has benefited the development of sports seats for the road.

RECARO actively transfers the developments made in Motorsports, from a close liaison with many drivers and our own RECARO racing team, to our sports seats for the road, resulting in products that are unrivalled in terms of safety and seating technology. A sports seat from RECARO puts you in pole position.

And in practice? Naturally, even perfect sports seats must please the user. Individuality is more and more in demand. RECARO has always been 'the trendsetter' satisfying customers' individual requirements, including design, firm contours, optimum streamlining, individual styling and exclusive good looks: Get the Feeling – with a RECARO sports seat. The car seat that combines maximum sporting flair with super-modern design.

Don't compromise – give your car a new profile and enjoy a seating experience of a very special kind.

The most important RECARO features

RECARO safety:

Recommended for competitive drivers.

- Integrated headrest gives optimum protection (RECARO Speed, Sport, Pole Position ABE/TUV an Sportster CS).
- Motorsport shells give great support, we transferred the 'shell principle' to our roadcar seats, ensuring the foam parts – and therefore your back and shoulders – are firmly yet comfortably supported.
- Specially-shaped seat cushion provides optimal support and prevents the occupant 'submarining' in the event of a front collision (only in combination with a correctly fitted seatbelt).
- Belt guides allow the fitment of a 4-point belt system for perfect hold (RECARO Speed, Sport and Pole Position ABE/TUV only).

RECARO comfort:

Feel good – drive better.

Sports seats also need to be comfortable.

RECARO delivers extra comfort features:

- Choose the comfort package and get the unique RECARO Vent system: for a consistently pleasant and dry seat climate on hot days (standard equipment on RECARO Sport "Topline" and an optional extra on style).
- The special seat cushion design reduces road vibration (RECARO Sport and Style).
- All seats designed to give optimal lumbar support.
- Convenient operation, electrical adjustment also available (RECARO Sport "Sportline", "Topline" and Style).
- RECARO Airmatic lumbar system (RECARO Sport "Sportline", "Topline" and Style).

RECARO ergonomics:

Perfect support for your concentration.

The more competitive your driving style, the greater concentration you need. Everything must be just right: especially the seat:

- Ergonomically designed, firm upholstery supports your spine.
- Seat cushion extension supports your thigh muscles effectively. (Certain seats only)
- Combined, seat height and tilt adjustment ensures the best possible angle of vision and the correct sitting position (RECARO Sport "Sportline", "Topline" and Style).
- Strongly contoured side bolsters provide great support when cornering.
- Individual lumbar support by the RECARO Airmatic lumbar system with two separately adjustable air-chambers (RECARO Sport "Sportline", "Topline" and Style) or special cushion elements (RECARO Speed and Pole Position ABE/TUV).
- Extra high seat back providing tall drivers with maximum support (RECARO Style XL).

RECARO baseframes:

TUV-tested quality.

Only the best possible materials are used, guaranteeing a maximum level of safety. In each case, RECARO precisely adapts the baseframes to the characteristics of the vehicle. That's why RECARO seats and baseframes are all ABE/TUV ("General Type Approval") or TUV approved.

*Vehicles fitted with a side airbag in the seat as standard require TUV acceptance, even if an ABE (type approval) has been issued. This can be arranged through your RECARO dealer.

RECARO seats as standard equipment:

The right decision – ex factory.

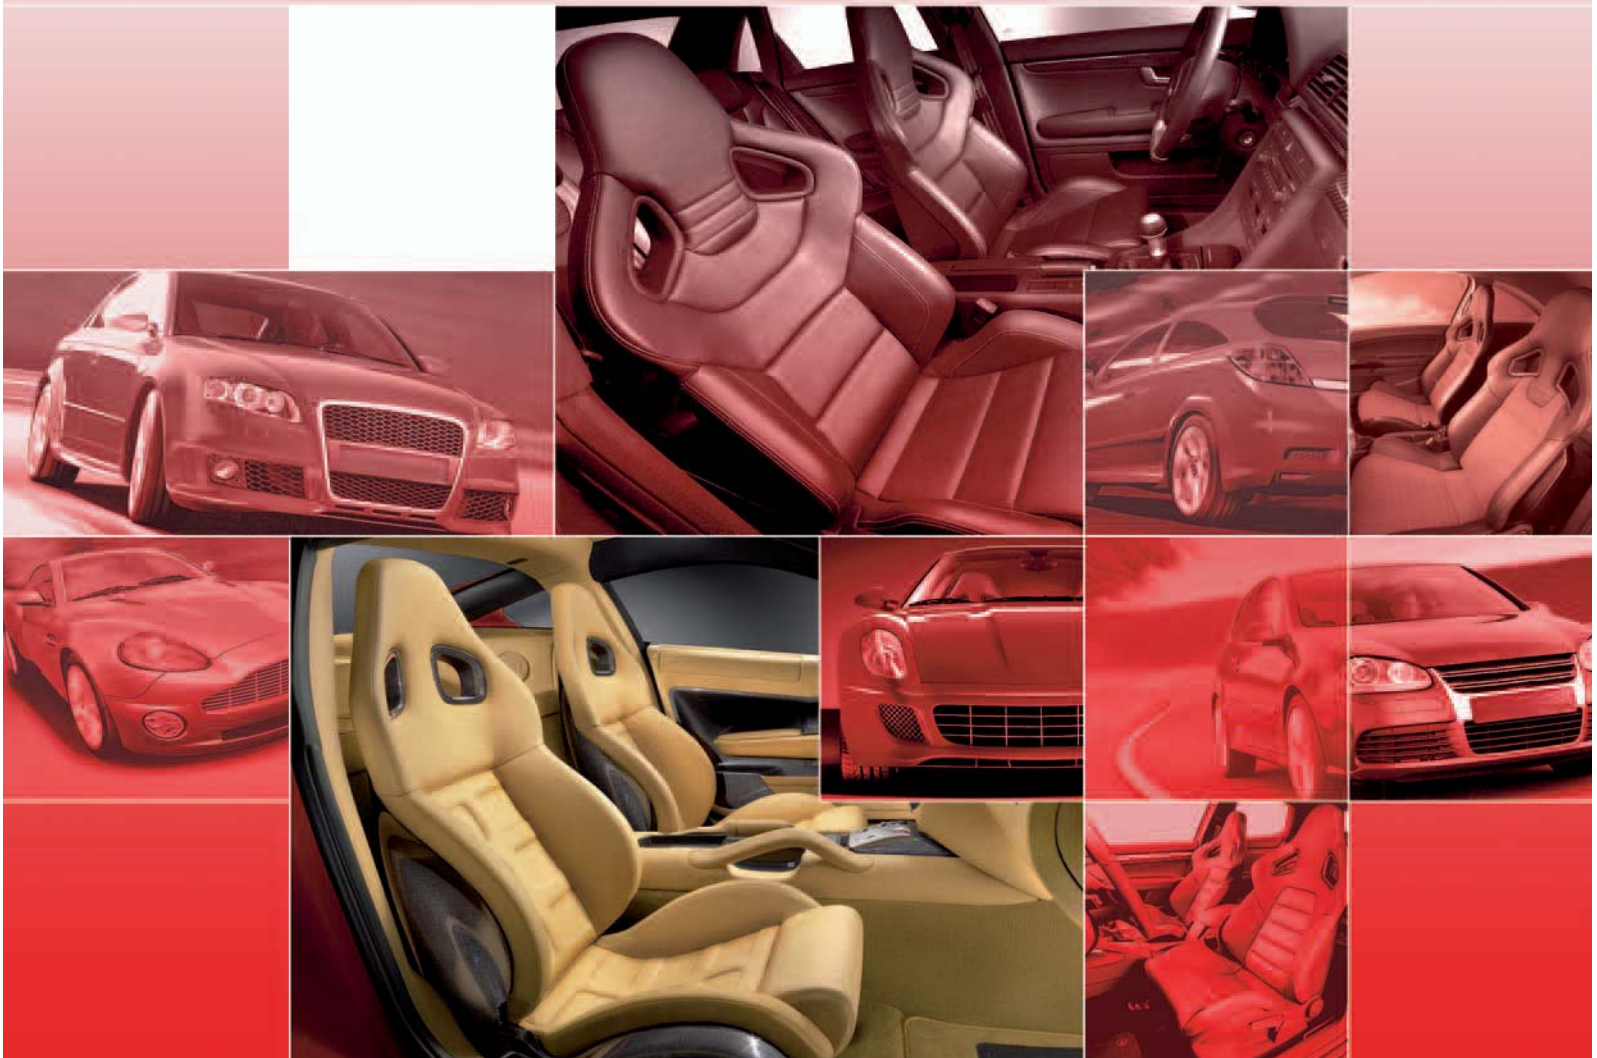

What do you think of in terms of perfect equipment in your new car? Climate control, sports suspension or alloy wheels? CD multi-changer, Sat-Nav and a leather sports steering-wheel? Sure – all great features, but don't forget the most important one! Next time you choose extras, think RECARO.

RECARO is the world's best known seat manufacturer. Throughout its hundred year history, the name RECARO has been a benchmark. Synonymous with quality. A symbol of value.

A brand you can trust. A sign of luxury. This pedigree has resulted in many of the world's premium car manufacturers relying on RECARO's superb technology.

RECARO seats are available from: Aston Martin, Audi, BMW, Ferrari, Ford, Jaguar, Lamborghini, Opel, Porsche, Seat or Volkswagen.

Next time you buy a car, go for RECARO seats and experience the difference: Improved support, a safer drive, a sportier feel – now enjoy the luxury.

RECARO Pole Position (ABE/TUV)

With ABE/TUV

ABE/TUV with 3-point seatbelt for:

Audi: A3 (8L, 8P), A4 (8E), A6 (4F)

Comfortable off-road: RECARO Cross Speed – "M" version.

Off-road, the RECARO Cross Speed offers optimised seat comfort and a sporty side support, as well as easy entry and exit. The RECARO Cross Speed S, its length-adjustable, flat seat cushion is particularly suitable for medium-sized to large persons, for drivers who frequently get in and out of their vehicles and for vehicles with a high entry position.

RECARO Cross Speed L

Belt guide for 4-point safety belt system; 3-point belt system can also be used

Specially formed shoulder support for optimum lateral hold

Well-defined seat cushion and backrest bolsters for superb lateral hold when cornering

Seat cushion extension: better thigh support relieves muscle tension

Integrated headrest for reliable head protection

Backrest tilt-forward release on both sides for simple operation

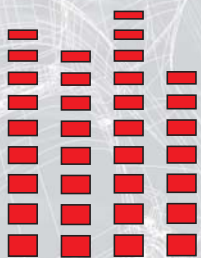

Lumbar support for ergonomic, fatigue-free seating

Recline adjustment on both sides for comfortable operation

Model "L": length-adjustable seat cushion with intermediate side bolsters offering excellent lateral support

Photo includes options

Options at additional cost:
Coverings, see page 17.

Comfortable off-road: RECARO Cross Speed – "L" version.

Off-road, the RECARO Cross Speed offers optimised seat comfort and a sporty side support, as well as easy entry and exit. The RECARO Cross Speed L is the ideal solution for **medium-sized persons** who attach great importance to **good side support** while driving. The seat surface, with pronounced side support, has a sporty design.

RECARO Sport "Trendline"

Belt guide for 4-point belt system, the 3-point belt can also be used

Strongly contoured shoulder support relieves muscle tension when cornering

Firm upholstery gives the driver the right feel for the road

Well-defined side bolsters for a firmer sitting position offering support when cornering

Seat cushion extension: better thigh support relieves muscle tension and permits fast pedal changes

Integrated, fully upholstered headrest for the best possible head protection

Available with or without belt guides

Well-defined side bolsters for a firmer sitting position offering support when cornering

Backrest release and adjustment on both sides for simple, easy operation

Bearing-mounted seat cushion reduces road vibration

Photo includes options

Options at additional cost:

Coverings see page 18, specified seat material.

A sports seat par excellence.

For competitive drivers who make the highest demands on themselves, their cars and their car seats. Excellent location allows for a better and more concentrated driving style, with quicker and more precise reactions. With its high specification, the RECARO Sport "Trendline" will meet your expectations!

Cover choice

Quality, individuality and variety.

The range of materials, leather and colour variants satisfies both our own exacting quality criteria and the interior designs of the vehicle manufacturer. This guarantees that the seats can be smoothly integrated into your vehicle. The versatile combination of RECARO seat covers ensure the best possible coordination with the vehicle. Some seats can even be covered in your vehicle's original material, provided that it is compatible with your RECARO seat. This is how we customise your standard production vehicle.

RECARO Coverings			
Velour	Artista	Nardo	Saturn
			
			
<p>Velour: The robust and easy-care material that is also used to cover the RECARO racing shells for motorsport.</p>	<p>Artista: The timelessly elegant material for a refined visual appearance in the vehicle interior. Guarantees longevity and durability.</p>	<p>Nardo: In combination with the Artista covers, these extremely durable materials ensure the longevity of the side bolsters.</p>	<p>Saturn: The 3D effect, rubber burled cover ensures striking visual appearance and effectively prevents slipping in the seat.</p>

A new dimension in seating

Practical know-how gained in the field of motor sport forms the basis for the development of RECARO seats for normal road use. In addition to outstanding side support and firm upholstery, all RECARO seats – be they child seats, sports seats, ergonomic seats or standard equipment – offer the particular safety and ergonomics of a true RECARO, as tested by users over and over again.

RECARO – a new dimension in seating.
