

FIRST CHOICE FOR FLEETS

Milford have drawn on their vast experience and expertise in the field of vehicle load restraint while working closely with fleet vehicle users and managers in a quest to offer a new level of convenience & safety for all vehicle occupants.

The all new Gear-Safe provides the ultimate in versatility as it safely stores and secures a wide variety of items used during most work and leisure activities.

MILFORD - BEHIND YOU ALL THE WAY!

For more than 20 years, Milford has successfully designed, tested and manufactured its unique range of Vehicle Load Restraint (VLR) products to the highest possible standards.

Milford is independently accredited by the Australian Testing Authority (NATA) to test its products to AS/NZS 4034, the most stringent load restraint performance Standard in the world.

Milford has the largest range of VLR products worldwide with a range of more than 200 Cargo Barriers, Gear-Safes and Safety Nets to suit all manner of Passenger, Light Commercial and Sports Utility Vehicles.

Insist on Milford - otherwise the odds are stacked against you and your family!

Feature	Description		
Volume	GS500 69L	GS640 88L	GS960 132L
Restraint Interface	Vehicle Seatbelt Vehicle Tie Downs		
Full Zip Enclosure	Product may be fully closed by zipper.		
Folding Pattern	Enables collapsibility of all sizes to a height of 80mm. Enables rapid expansion of all sizes to specified volumes.		
Tether System	Rigidity and strength maintained by tether straps and side-release buckles (top and sides).		
Partitioning	Collapsible partition allows segregation of cargo.		
Interior Pockets	Interior pockets allow for storage of flat (15mm) objects - i.e. documents e.t.c.		
Interior Elastic Loops	Elastic loops allow for upright storage of circular (ø100mm) objects - i.e. bottles.		
Interior Business Card Holder	Interior business card holder for business cards and pens.		
Liquid Containment	Short-term containment of interior spillage for liquids up to a level of 70mm above base of unit.		
Water Resistance	Product is spray / splash resistant.		
Restraint Harness and Integration with Gear-Safe			
Feature	Description		
Adjustable Restraint Harness	Restraint harness engages with pre-existing vehicle tie-downs. Macro adjustment of webbing length through front and rear buckles.		
Front Integration with Restraint Harness	Positive tear-drop engagement with the front buckles of restraint harness.		
Rear Integration with Restraint Harness	Tongue-and-loop engagement with rear loop of restraint harness.		
Binary Micro-Tensioning / Release System	The Gear-Safe may be micro-tensioned to maintain position throughout ambient operation (i.e. normal acceleration / deceleration). It may easily be released from tension on removal. This operation incorporates the use of black and red tether straps.		
Undersleave	Undersleave (sleeve on under-side of Gear-Safe) allows for longitudinal travel of tongue-and-loop engagement during micro-tensioning. It also contributes to vertical restraint.

Introducing...

GEAR-SAFE™

First Choice for Fleets

Behind you all the way

“Driving with unorganised gear can be a risky business...”

MANAGING THE RISK OF OCCUPANT INJURY

There's a myriad of items that can share the cabin area with the occupants of modern motor vehicles. It's important to recognise that these same items also create the potential for occupant injury in an emergency or crash situation. This risk of injury is further compounded by the need to use the same vehicle for both work and leisure activities. As a result, there is a clear need to organise and safely restrain these items at all times.

With all of this in mind, Milford has developed the all new Gear-Safe to provide the highest level of functionality, ease of use and safe load restraint.

Personal Safety

- o Gear-Safe safely organises its contents
- o Gear-Safe is securely restrained by a sophisticated mounting system, offering a new level of occupant safety!

Visual Security

- o Gear-Safe is easily closed to protect valuable equipment from the visual attention of those outside the vehicle

FLEXIBILITY PLUS!

Given that vehicle users have differing needs, Gear-Safe offers multiple mounting and restraint options.

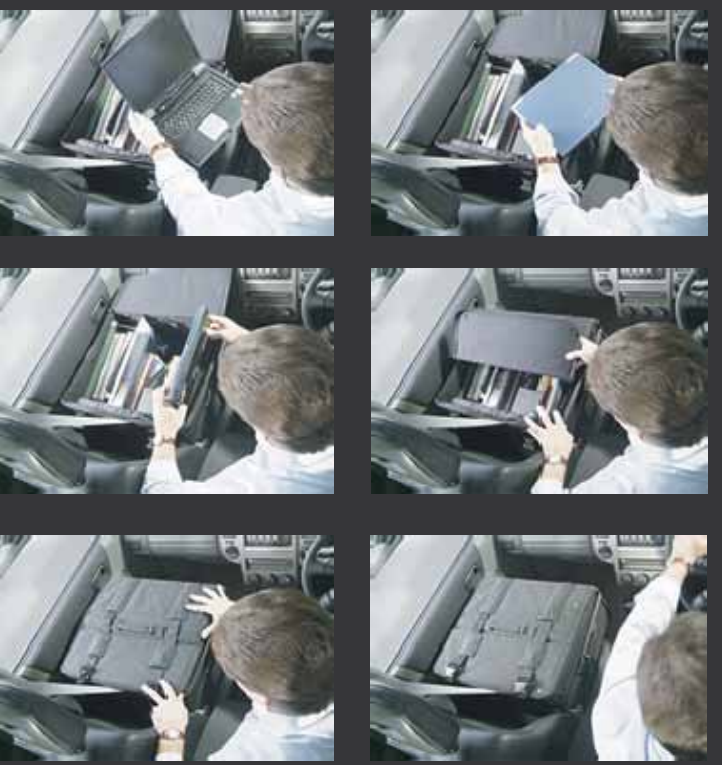

This wide variety of options ensures that Gear-Safe will meet the widest possible variety of restraint and organisational requirements for all vehicles.

Flexible Positioning

- o Front Seat
- o Rear Seat
- o Load Area
- o Boot / Trunk

Universal Application

- o Hatches
- o Sedans
- o Wagons
- o SUV's / 4WD's
- o Minivans / People Movers
- o Pick-Up's / Utilities

SAFE & SURE

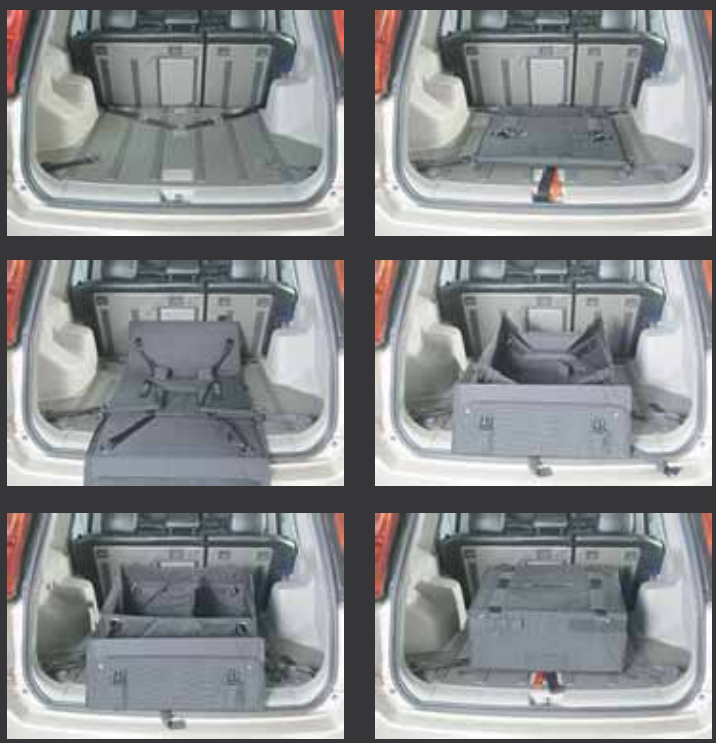

Gear-Safe is a new product that successfully organises loose items in the vehicle while keeping them safely restrained and visually secure.

Weekday Organisation

- o Gear-Safe provides adaptable storage for a wide variety of work gear
- o Gear-Safe can be fitted easily without the need for special tools
- o Gear-Safe is easily folded and stored in or out of the vehicle
- o Gear-Safe can be easily relocated from one vehicle to another
- o Gear-Safe is light and easy to handle by one person

Weekend Freedom

- o Gear-Safe can be quickly removed from any vehicle location to allow the weekend freedom required by most users
- o Gear-Safe can be quickly re-installed on Monday morning to provide all the safety required by Fleet Managers
- o Gear-Safe provides adaptable storage for general purpose, off-road, sporting & family driving requirements
- o Gear-Safe is light and easy to handle by one person
- o Gear-Safe can also be used outside of the vehicle as a convenient storage device

SMART DESIGN

Understanding the need to deliver a product which complements the interior of modern vehicles, Gear-Safe delivers pleasing aesthetics coupled with functional design. This ensures that users find Gear-Safe to be a functional and attractive accessory in which to safely organise items within their vehicle

Smart Appearance

- o Gear-Safe complements modern vehicle interiors
- o Gear-Safe protects the interior from damage caused by the movement of unrestrained items
- o Gear-Safe resists and protects from spills, scratching, abrasion and tears

Functional Design

- o Gear-Safe employs a unique, quick action fold & release mechanism
- o Gear-Safe offers a modular range of sizes - Small, Medium & Large
- o Gear-Safe uses safe, high quality & hard-wearing materials to ensure lasting good looks
- o Gear-Safe offers storage flexibility as it holds a wide range of office equipment, promotional material, laptops, shopping, sporting gear etc
- o Assorted pockets to organise and protect pens, business cards & elasticised holders for posters, umbrellas and other gear

...show some orderly restraint”
